Introduction

This guide is for beginners who want to personalize and optimize their Windows 11 computer. Whether you're setting up a new device or just want to refresh your experience, this manual will walk you through every step with screenshots and explanations.

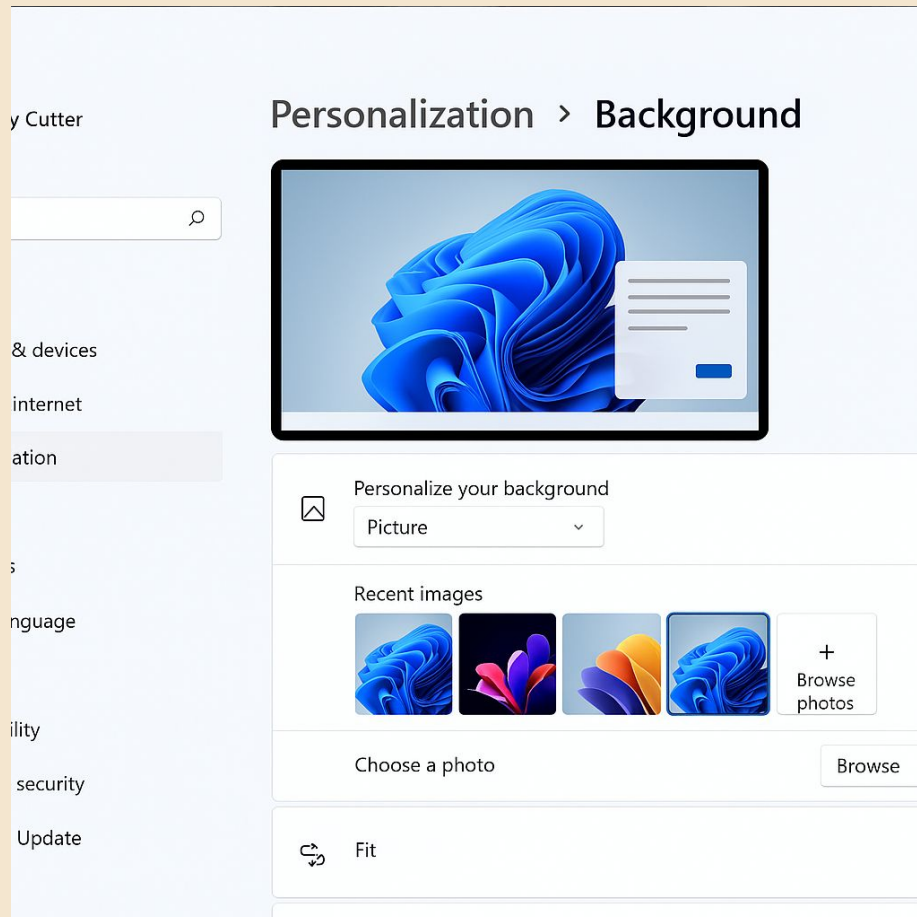

Choosing a Theme

1. Right-click the desktop > Click **Personalize**
2. Select **Themes** > Choose one of the default or browse Microsoft Store for more

Why: A theme personalizes your entire interface — from wallpaper to sounds and colors.

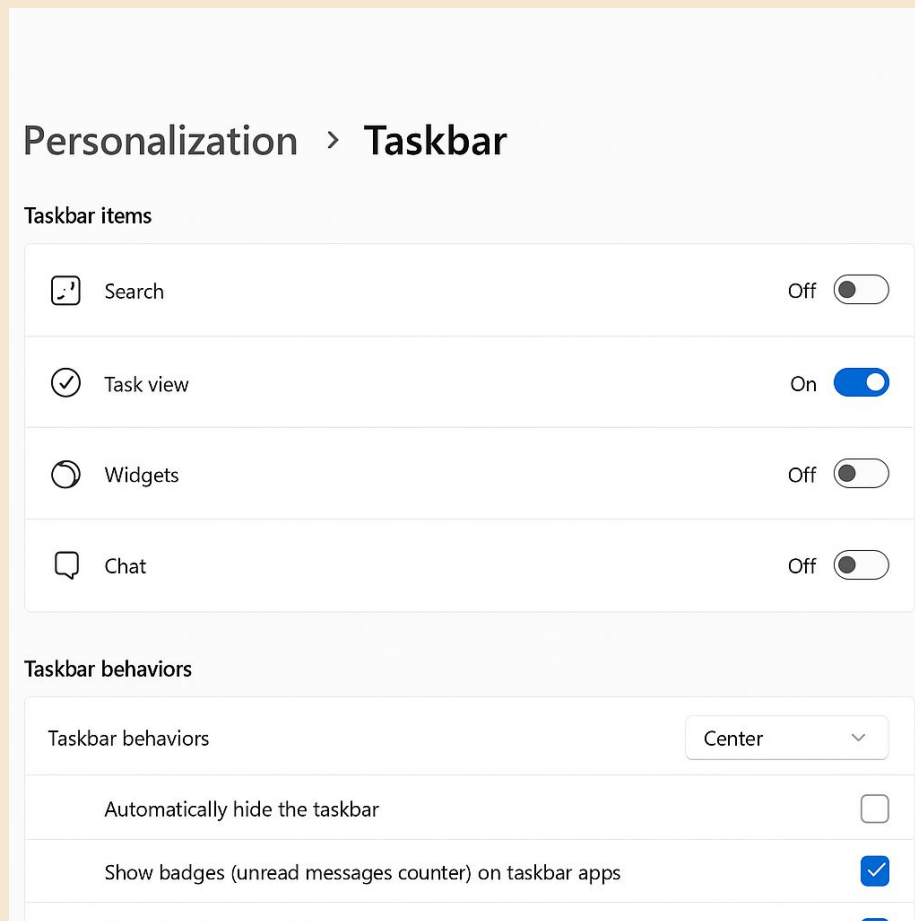

Changing your Desktop Background

1. Go to **Settings > Personalization > Background**
2. Choose **Picture**, **Solid color**, or **Slideshow**
3. Upload a custom image or pick from stock photos

Why: The background sets the visual tone every time you log in.

Customizing the Taskbar

1. Go to **Settings > Personalization > Lock Screen**
2. Choose background type and app status display

Why: The taskbar is your primary navigation tool. Make it work for you.

Personalizing the Lock Screen

1. Go to **Settings > Personalization > Lock Screen**
2. Choose background type and app status display

Why: Add utility (e.g., calendar, weather) or aesthetics to your lock screen.

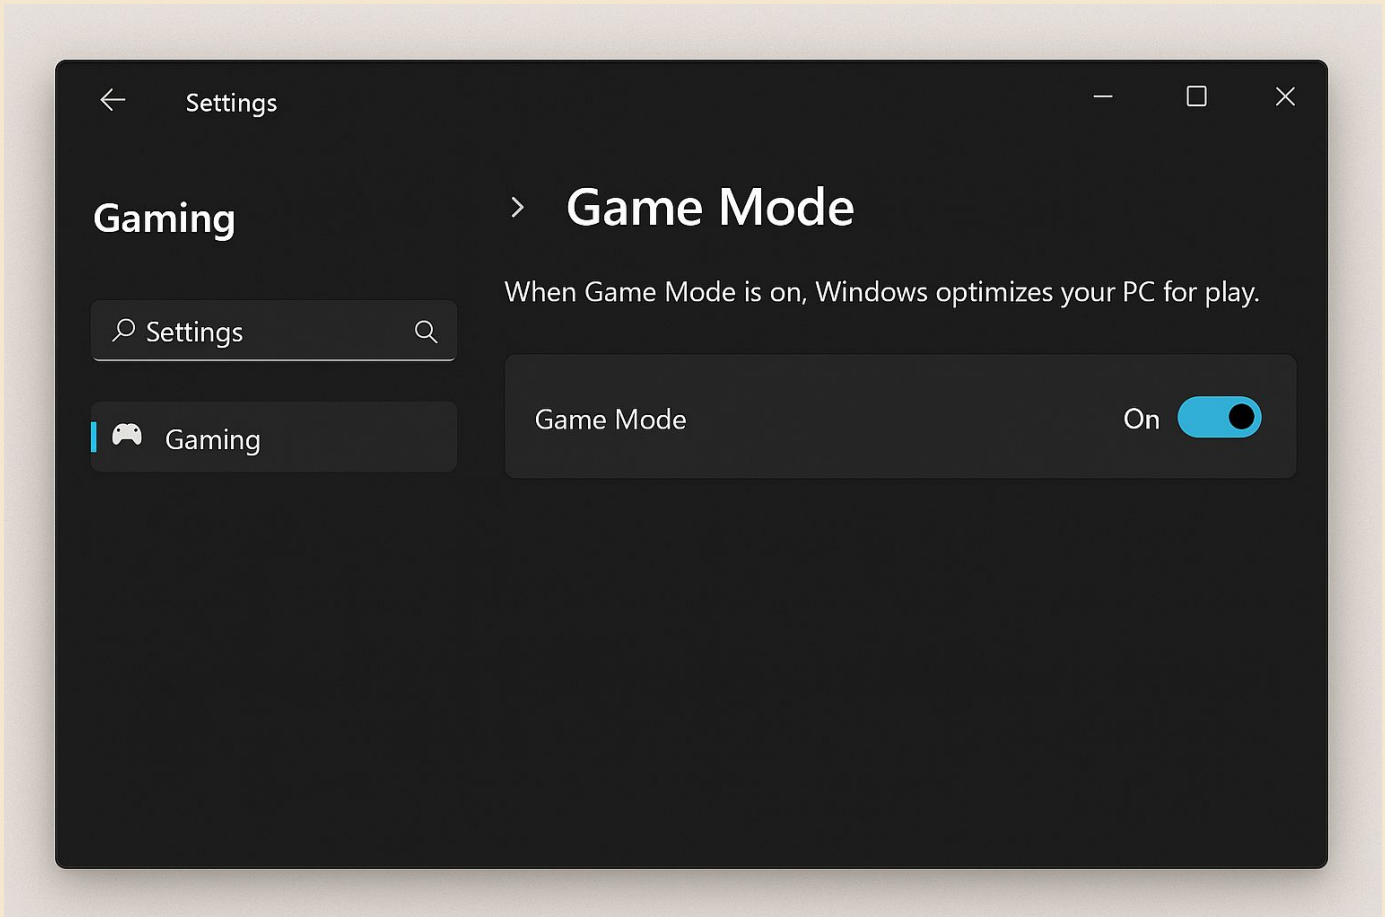

Personalizing the Lock Screen

1. Go to **Settings > Personalization > Lock Screen**
2. Choose background type and app status display

Why: Add utility (e.g., calendar, weather) or aesthetics to your lock screen.

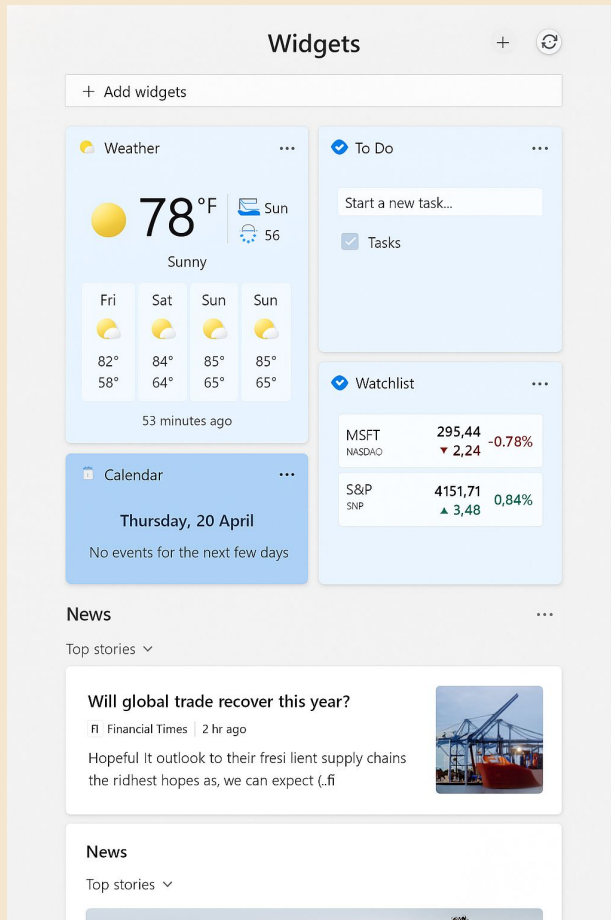

Enabling Game Mode

1. Go to **Settings > Gaming > Game Mode**
2. Toggle it ON

Why: Optimizes your PC's performance while playing games.

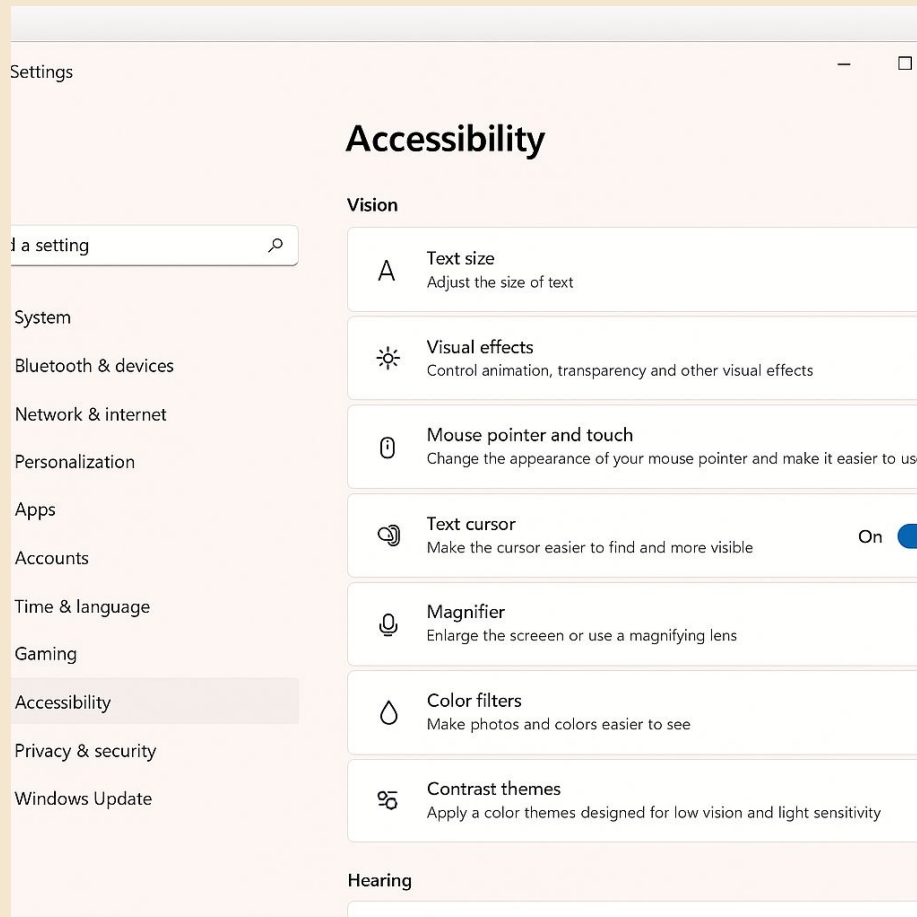

Using Widgets

1. Click the **Widgets** icon on the taskbar
2. Customize the layout (weather, calendar, to-do, etc.)

Why: Stay informed without opening full apps.

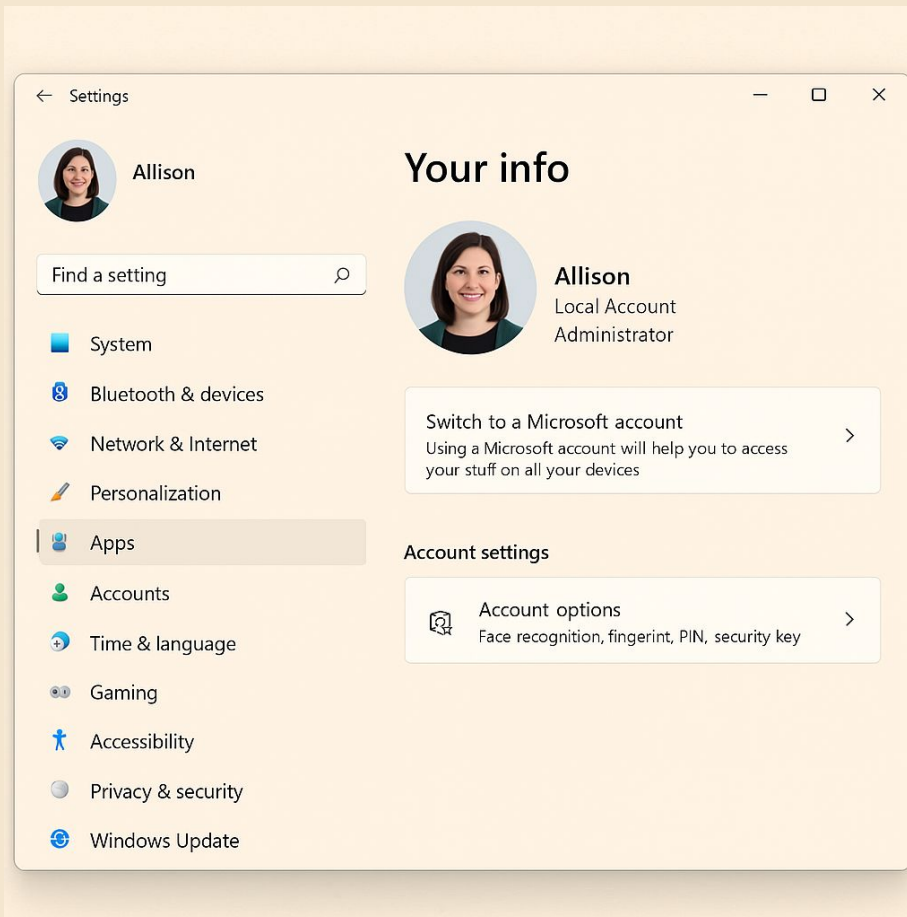

Setting Accessibility Features

1. Open **Settings > Accessibility**
2. Explore options like Magnifier, Narrator, High contrast, and Subtitles

Why: Makes the system easier for users with different needs.

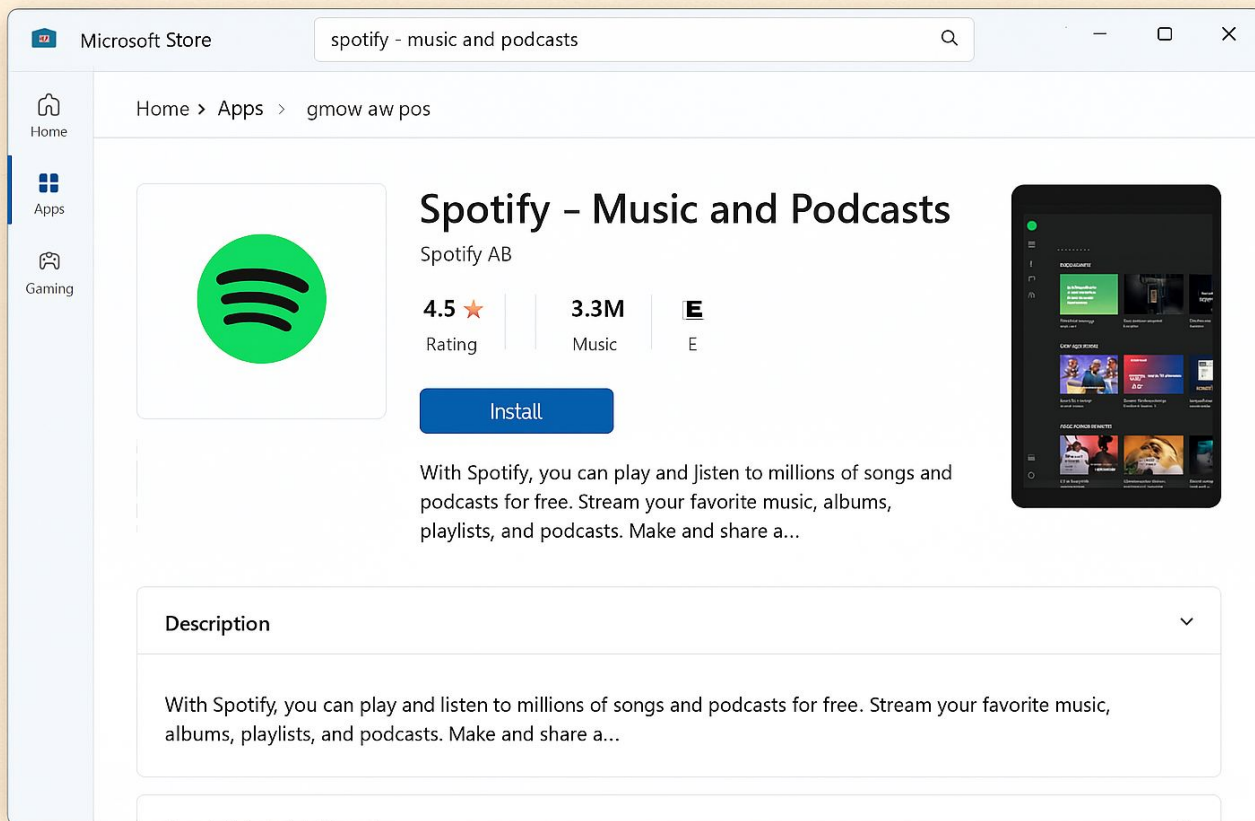

Creating a Local or Microsoft Account

1. Go to **Settings > Accounts > Your Info**
2. Choose between Microsoft or local account

Why: Microsoft account allows sync across devices. Local offers privacy.

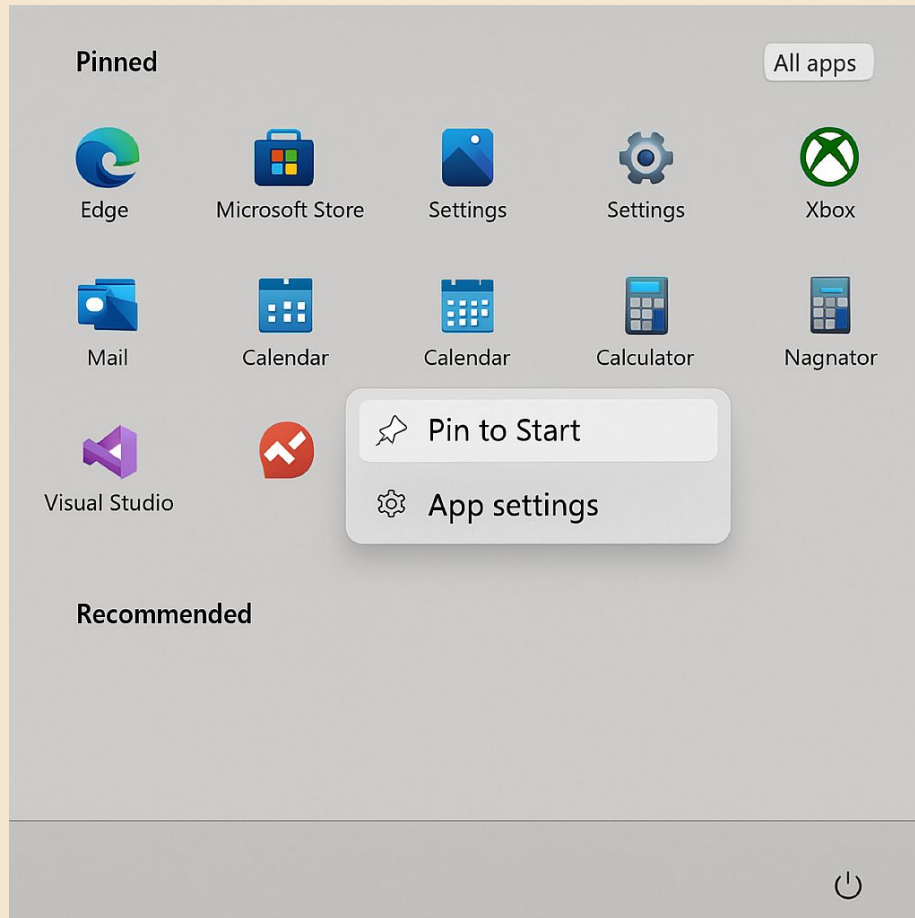

Installing Apps from Microsoft Store

1. Open **Microsoft Store** from the Start Menu
2. Use the search bar to find apps like Spotify, Netflix, or OneNote
3. Click **Get** to install

Why: It's the safest and easiest way to install trusted applications.

Pinning Apps to Start Menu

1. Open Start Menu
2. Right-click an app > **Pin to Start**

Why: Keeps your favorite apps within one click.

Setting Up Multiple Displays

System > Display

Rearrange your displays

Select a display to change the setting for it. Press and hold (or select) a display, then drag to rearrange

Multiple displays

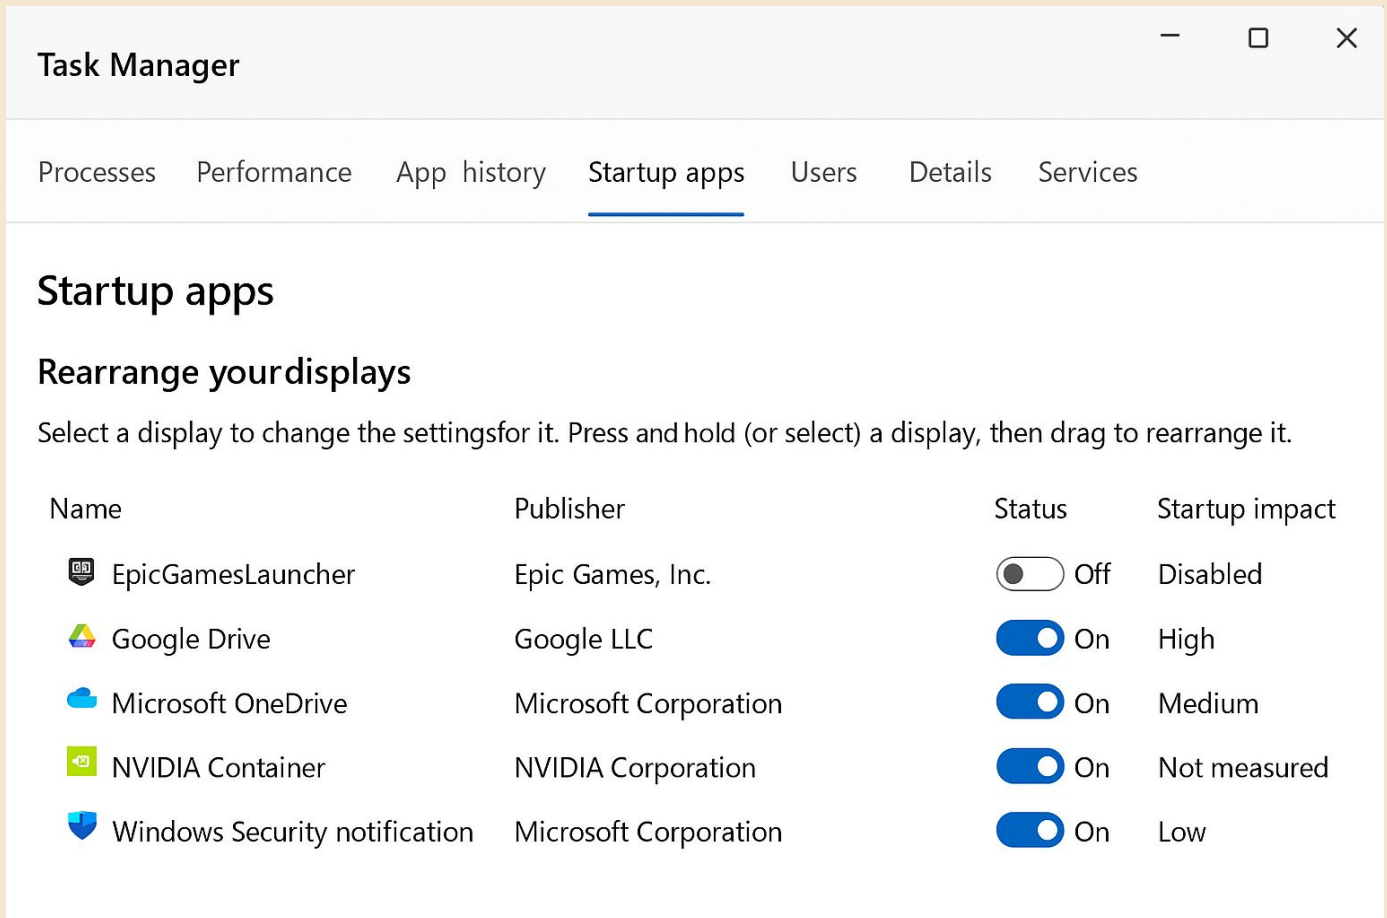

Extend

1. Plug in a second monitor
2. Go to **Display Settings > Multiple displays**
3. Choose **Extend**, **Duplicate**, or **Second screen only**

Why: Multi-monitor setups improve productivity for multitaskers.

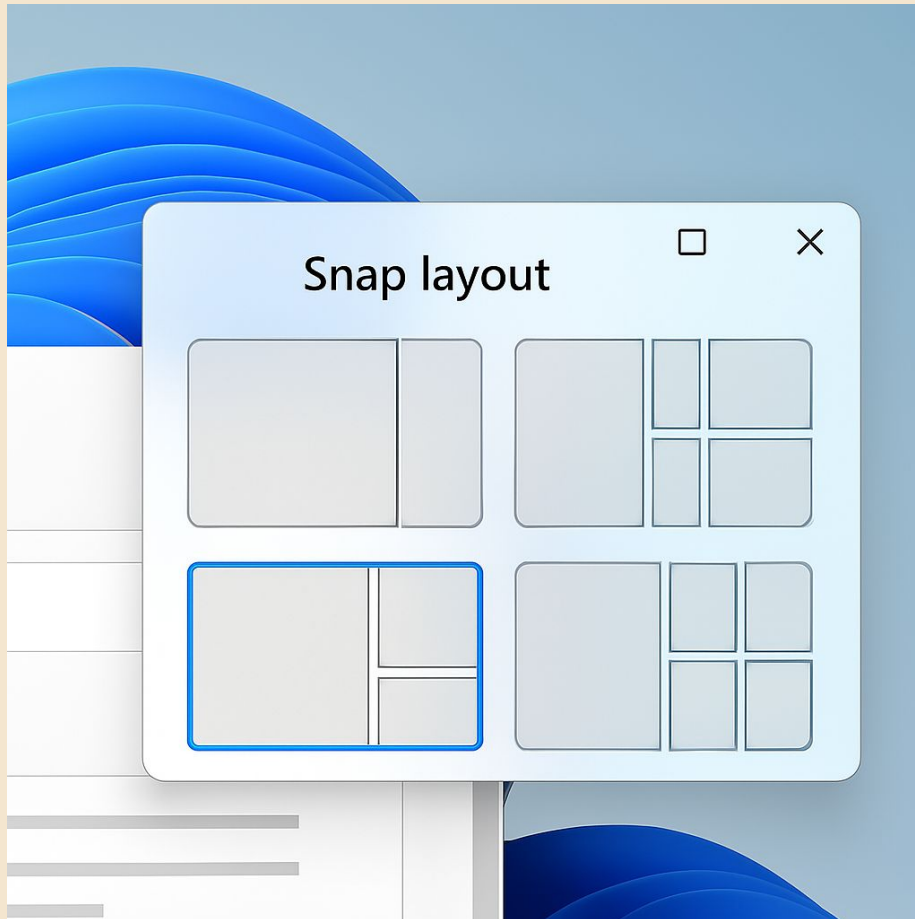

Managing Startup Apps

1. Plug in a second monitor
2. Go to **Display Settings > Multiple displays**
3. Choose **Extend**, **Duplicate**, or **Second screen only**

Why: Multi-monitor setups improve productivity for multitaskers.

Using Snap Layouts

1. Hover over the **Maximize** icon on any window
2. Choose a layout (split screen, grid, etc.)

Why: Helps organize multiple windows efficiently.

Glossary

- **Start Menu:** Main launch point for apps and settings
- **Taskbar:** Bottom bar that shows open apps and system icons
- **Widgets:** Small information cards for quick updates
- **Snap Layout:** Window arrangement feature
- **Game Mode:** Performance boost mode for gaming
